Now Micro IoT Player

## A secure, managed HTML5 playback appliance

The Now Micro IoT Player delivers digital signage to your users like a traditional player, while still maintaining a lower total cost of ownership and excluding features unused in a low-end device. Powered by Windows 10 IoT Core, the Now Micro IoT Player is regularly patched, manageable via API or web console while providing a low-overhead appliance experience. When faced with choosing an HTML5 player for digital signage, most organizations are forced to compromise security, manageability, support and device lifecycle/reliability.

Pain Points

✕ Most HTML5 players are unmanaged

✕ Managed players have expensive licenses

✕ Stuck with unpatched, insecure systems

✕ 9-12 month lifecycle hardware

✕ Forces you to use their CMS

Solution

☑ Fanless HTML5 content player

☑ No reoccuring management fees

☑ Patched and updated

☑ Long life hardware

☑ Use your content and CMS
